Interim MD&A - Quarterly Highlights
For the nine months ended March 31, 2022 and 2021

The Quarterly Highlights of ZincX Resources Corp. (the "Company" or "ZincX") provide a summary of the activities, results of operations and financial condition of the Company as at and for the nine months ended March 31, 2022. The Quarterly Highlights have been prepared by management as of May 27, 2022 and should be read in conjunction with the condensed consolidated interim financial statements and related notes thereto of the Company for the nine months ended March 31, 2022 and 2021, the audited consolidated financial statements and related notes thereto of the Company for the years ended June 30, 2021 and 2020, which were prepared in accordance with International Financial Reporting Standards ("IFRS"), and the annual Management Discussion and Analysis ("MD&A") for the years ended June 30, 2021 and 2020 of the Company.

The Company's shares trade on the TSX Venture Exchange ("TSX-V") under the symbol ZNX and in Frankfurt under the symbol "M9R". The Company has recently commenced trading its common shares on the OTCQB market, a U.S. trading platform that is operated by the OTC Markets Group in New York, under the ticker symbol "ZNCXF".

Exploration Programs

The Company operates in one business segment, that being the exploration and development of mineral properties in British Columbia, Canada.

The Company's flagship Akie Project is host to the Cardiac Creek deposit. The Company holds a 100% interest in the Akie Property, which is located approximately 260 kilometers north-northwest of the town of Mackenzie in northeastern British Columbia.

The Akie zinc-lead-silver property is situated within the Kechika Trough, the southernmost extension of the regionally extensive Paleozoic Selwyn Basin, one of the most prolific sedimentary basins in the world for the occurrence of sedimentary exhalative (SEDEX) zinc-lead-silver deposits and stratiform barite deposits. Drilling on the Akie property by the Company since 2005 has identified a significant body of barite rich zinc-lead-silver SEDEX mineralization known as the Cardiac Creek deposit. The deposit is hosted by siliceous, carbonaceous, fine-grained clastic rocks of the Middle to Late Devonian Gunsteel Formation.

The Company updated the estimate of mineral resources at Cardiac Creek in early 2018, which are presented below:

ESTIMATE OF MINERAL RESOURCES - CARDIAC CREEK DEPOSIT

	5% z	inc cut-off g	Contained metal				
Category	Tonnes (million)	Zn (%)	Pb (%)	Ag (g/t)	Zn (B lbs) Pb (B lbs		Ag (M oz)
Indicated	22.7	8.32	1.61	14.1	4.162	0.804	10.3
Inferred	7.5	7.04	1.24	12.0	1.169	0.205	2.9

Note: Mineral resources are not mineral reserves because the economic viability has not been demonstrated.

The updated mineral resource estimate was prepared by Robert Sim, P.Geo with the assistance of Bruce Davis, FAusIMM. Mr. Sim is an independent Qualified Person within the meaning of NI 43-101 for the purposes of mineral resource estimates and was responsible for the 2008 maiden resource and the 2012 and the 2016 updated mineral resource estimates.

Interim MD&A - Quarterly Highlights
For the nine months ended March 31, 2022 and 2021

The updated mineral resource estimate and the results of a Preliminary Economic Assessment ("PEA") for the Cardiac Creek deposit were filed in a report entitled "NI 43-101 Technical Report Akie Project British Columbia, Canada" with an effective date of June 20, 2018 and report date of August 1, 2018. The report can be found under the Company's profile at www.sedar.com and on the Company's website, www.zincxresources.com.

The Kechika Regional Project consists of 11 properties including the Mt. Alcock, Bear & Spa, Pie, Yuen, and Cirque East properties that extend northwest from the Akie property for approximately 140 kilometres along the strike of the highly prospective Gunsteel Formation shale. The Gunsteel Formation shale is the main host rock for known SEDEX zinc-lead-silver deposits in the Kechika Trough of northeastern British Columbia.

The Pie, Yuen, Cirque East properties (known as the "Pie Properties") are the subject of a joint venture arrangement with Teck Resources Limited ("Teck") and its JV partner, Korea Zinc Co., Ltd. ("Korea Zinc") to jointly explore the Pie Properties on a 49%-51% joint venture basis, with Teck acting as the operator. Teck and Korea Zinc acquired 51% interest in the Pie Properties by incurring cumulative aggregate exploration expenditures of \$3,500,000 by December 31, 2017.

Overall performance

2021 Exploration Program

2021 Akie Drill Result Highlights

The Company completed a large-diameter HQ diamond drill program in 2021 that focused on the Cardiac Creek deposit. A total of 5 drill holes were drilled on the Cardiac Creek deposit for a total of 2,669 metres. All five holes successfully tested the Cardiac Creek Zone with excellent recovery of thick intervals of sphalerite-galena-barite mineralization displaying the highly mottled textures which generally indicate greater than average zinc grades.

- Drill hole A-21-155 returned 6.20% Zn+Pb and 9.6 g/t Ag over a true width of 32.76 metres including 10.77% Zn+Pb and 14.5 g/t Ag over a true width of 5.99 metres
- Drill hole A-21-157 returned 4.83% Zn+Pb and 7.7 g/t Ag over a true width of 22.61 metres including 10.62% Zn+Pb and 15.1 g/t Ag over a true width of 2.52 metres
- Drill hole **A-21-158** returned 9.09% Zn+Pb and 14.4 g/t Ag over a true width of 5.83 metres contained within a longer mineralized interval of **6.21% Zn+Pb** and **10.3** g/t Ag over a true width of **14.38** metres.
- Drill hole A-21-159 returned 5.59% Zn+Pb and 8.7 g/t Ag over a true width of 19.55 metres including 8.92% Zn+Pb and 10.3 g/t Ag over a true width of 3.10 metres.

A-21-155

Drill hole A-21-155 targeted the northwest area of the high-grade core proximal to historical drill holes A-07-51, A-13-107, and A-17-132. A broad envelope of mineralisation was intersected from 549.37 to 602.24 metres representing a true width of 39.67 metres that returned 5.3% Zn+Pb and 8.5 g/t Ag. Within this envelope the Cardiac Creek Zone is present from 558.56 to 602.24 metres, grading 6.20% Zn+Pb and 15.5 g/t Ag over a true width of 32.76 metres. Higher-grade intervals are present including 10.77% Zn+Pb and 14.5 g/t Ag over a true width of 5.99 metres from 569.67 to 577.66 metres. The Footwall Zone was intersected below the Cardiac Creek Zone from 593.45 to 577.66 metres and returned 9.0% Zn+Pb and 12.3 g/t Ag over a true width of 6.59 metres.

Interim MD&A - Quarterly Highlights
For the nine months ended March 31, 2022 and 2021

A-21-156B

Drill hole A-21-156B that targeted the central portion of the deposit testing the down-dip extent of the high-grade core. Surrounding holes include A-06-35, A-15-126, and A-15-127.

A broad envelope of mineralisation was intersected from 615.05 to 675.11 metres representing a true width of 33.36 metres that returned 2.58% Zn+Pb and 4.9 g/t Ag. Within this envelope the Cardiac Creek Zone is present from 652.53 to 675.11 metres, grading 5.69% Zn+Pb and 9.0 g/t Ag over a true width of 12.60 metres. Higher-grade intervals are present including 6.88% Zn+Pb and 11.1 g/t Ag over a true width of 8.84 metres from 658.61 to 674.44 metres; and 8.96% Zn+Pb and 14.8 g/t Ag over a true width of 3.60 metres from 668.00 to 674.44 metres. The Footwall Zone intersected 7.85% Zn+Pb and 10.2 g/t Ag over a true width of 5.71 metres from 685.65 to 695.76 metres that includes 9.72% Zn+Pb and 8.9 g/t Ag over a true width of 2.18 metres from 691.91 to 695.76 metres.

A-21-157

Drill hole A-21-157 targeted the southeast strike extents of the high-grade core of the Cardiac Creek zone. Surrounding holes include A-05-33, A-06-40, and A-13-105.

A broad envelope of mineralisation was intersected from 359.30 to 412.96 metres representing a true width of 36.54 metres that returned 3.55% Zn+Pb and 6.2 g/t Ag. Within this envelope the Cardiac Creek Zone is present from 372.60 to 405.82 metres, grading 4.83% Zn+Pb and 7.7 g/t Ag over a true width of 22.61 metres. Higher-grade intervals are present including 6.84% Zn+Pb and 9.1 g/t Ag over a true width of 8.17 metres from 386.0 to 398.00 metres; and 10.62% Zn+Pb and 15.1 g/t Ag over a true width of 2.52 metres from 394.3 to 398.0 metres.

A-21-158

<u>Drill hole A-21-158 targeted an open area in the immediate vicinity of A-11-96, A-11-98 and A-14-115 along the southeast edge of the high-grade core.</u>

A broad envelope of mineralisation was intersected from 275.50 to 305.23 metres representing a true width of 25.34 metres that returned 4.82% Zn+Pb and 7.4 g/t Ag. Within this envelope the Cardiac Creek Zone is present from 288.37 to 305.23 metres, grading 6.21% Zn+Pb and 10.3 g/t Ag over a true width of 14.38 **metres**. Higher-grade intervals are present including 9.09% Zn+Pb and 14.4 g/t Ag over a true width of 5.83 metres from 294.42 to 301.25 metres; The Zone hosts a total of 9 samples that grade in excess of 7% Zn and 1% Pb over an aggregate core length of 5.44 metres. Within the Cardiac Creek Zone individual zinc grades range up to 17.84% and lead grades range up to 3.21%.

A-21-159

Drill hole A-21-159 targeted the southeast strike extents of the Cardiac Creek deposit's high-grade core. Surrounding holes include A-05-33, A-08-55, A-08-64.

A broad envelope of mineralisation was intersected from 386.83 to 440.75 metres representing a true width of 38.53 metres that returned 4.09% Zn+Pb and 6.9 g/t Ag. Within this envelope the Cardiac Creek Zone is present from 401.50 to 428.83 metres, grading 5.59% Zn+Pb and 8.7 g/t Ag over a true width of 19.55 metres. Higher-grade intervals are present including 6.43% Zn+Pb and 9.5 g/t Ag over a true width of 13.66 metres from 409.75 to 428.83 metres as well as 8.92% Zn+Pb, and 10.3 g/t Ag over a true width of 3.10 metres from 424.50 to 428.83 metres. A narrow Footwall Zone is present from 432.40 to 440.75 metres over a true width of 5.98 metres that returned 5.06% Zn+Pb, and 9.1 g/t Ag including 7.16% Zn+Pb, and 10.2 g/t Ag over a true with of 3.80 metres from 432.40 to 437.70 metres. The Zone hosts a total of 13 samples that grade in excess of 7% Zn and 1% Pb over an aggregate core length of 8.01 metres. Within the Cardiac Creek Zone individual zinc grades range up to 15.64% and lead grades range up to 2.95%.

Interim MD&A - Quarterly Highlights

^(*) The true width in metres is calculated utilising the Geovia GEMS software package. The orientation of the mineralised horizon is estimated to have an azimuth of 130 degrees and a dip of -70 degrees. (CCZ) = Cardiac Creek Zone; (HW) = Hangingwall Zone; (FW) = Footwall Zone; (MS) = Massive Sulphide. (†) Ag values below detection were given a value half of the detection limit for the purposes of weighted averaging.

The primary objective of the 2021 drill program was to acquire mineralized Zn-Pb-Ag drill core samples for advanced metallurgical testing. This material will be used to further investigate previous metallurgical testing of the mineralization with a focus on enhancing the recoveries and boosting concentrate grades for both zinc and

Interim MD&A - Quarterly Highlights
For the nine months ended March 31, 2022 and 2021

lead; using a state-of-the-art metallurgical testing facility owned by key strategic shareholder Tongling Non-Ferrous Metals of China (Tongling).

A total of six individual metallurgical samples were selected, two from hole A-21-156B and one from each of the remaining drill holes. Individual samples averaged 228 kilograms and the total combined weight is in excess of 1,350 kilograms.

The samples were shipped from Vancouver by air freight to the Hunan Research Institute for Non-Ferrous Metals Co. Ltd., the metallurgical laboratory located in Changsha, China. The lab will conduct the metallurgical testing on behalf of Tongling.

Kechika Trough Target Initiative Update

Detailed work has identified numerous Areas of Interest (AOIs) of which 19 have been classified as high-priority targets. These targets have been ranked and will be assessed in future focused field programs.

The Company has identified 19 high-priority targets from a pool of 95 AOIs across all its Kechika Trough tenure including key properties such as Akie, Pie, Mt. Alcock, and Bear/Spa. A set of district specific exploration criteria have been established from the study of past discoveries in the region (e.g. Cardiac Creek deposit, Cirque, Driftpile, etc.). Potential AOIs were assessed using these criteria and evaluated against the geological, geochemical, geophysical and geographical datasets present within the Kechika Trough Exploration Database to identify prospective AOIs. Work has been recommended representing early stage through to drill exploration targets. This evaluation also identified prospective areas on several properties that have had little to no exploration. The 19 ranked high-priority targets are located on almost every property within the district. Several target areas are classified as drill-ready while others require additional work to be upgraded. In some cases, these high-priority targets are associated with adjacent or proximal AOIs that pending exploration success could elevate their ranking.

One of the highest priority targets is the Mt. Alcock prospect located approximately 40 kilometres northwest of the Akie property and 20 kilometres northwest of Teck Resources/Korea Zinc's Cirque property. The Mt. Alcock prospect, discovered in the late 1970s, is defined by a prominent massive barite cap ("kill zone) which hosts abundant coarse-grained galena and sphalerite on surface. Limited and shallow drilling by previous operators intersected mineralisation with significant grade such as 9.30% combined Zn+Pb and 1.20 oz/t Ag over 8.8 metres in drill hole AK-89-3 including 14.20% combined Zn+Pb and 1.60 oz/t Ag over 3.6 metres hosted in Gunsteel formation shale. Facies models recently derived by the Company from close examination of the Cardiac Creek deposit can be applied to the Mt. Alcock prospect and greatly assist in vectoring future targeted drilling at depth and down dip of prospective lithology. The tenor and style of mineralization at Cardiac Creek is a close analog and serves as an exploration model going forward. Mineralization in the district, including Cirque, and Driftpile, along with historical drilling, geochemical data and geophysical EM trends all support the exploration model.

Other high-priority targets are present on the Saint and Thro properties located to the northwest of the Driftpile deposit. Targets on the Saint property are associated with a long continuous Pb soil anomaly with approximate dimensions of 3,500m x 500m with values consistently in excess of 100 ppm and localized areas where values can range up to 6,500 ppm. Historical operators recommended drilling for this target area, but it was never pursued. On the Thro property historical work outlined an approximate 600m x 600m Pb soil anomaly with values consistently in excess of 100 ppm and range up to 12,500 ppm. Rock chip samples in the vicinity were also elevated in lead and rock chips taken from a hand dug trench in 1978 returned highly anomalous Pb values in excess of 400 ppm and ranging up to 5,600 ppm. These anomalies represent some of the largest in the district

Interim MD&A - Quarterly Highlights
For the nine months ended March 31, 2022 and 2021

and both remain untested by drilling. Almost all the known deposits in the district are associated with a distinct Pb soil signature making the targets on the Saint and Thro properties attractive drill targets.

Permitting

The Company has been advised by the Ministry of Energy, Mines and Petroleum Resources that the surface drilling permit for the Akie property has been renewed for an additional 5-year period that now extends exploration activities to December 31st, 2026. The permit originally expired on December 31st, 2020; however due to COVID-19 it was given a one-time, one-year extension to December 31st, 2021.

The Company has also filed an annual Statement of Cost with the Ministry of Energy, Mines and Low Carbon Innovation based on exploration expenditures incurred during the 2021 drill program. The filing has extended the entire **contiguous claim package in good standing to September 13, 2030**.

2020 Exploration Program

2020 Akie Drilling & Field Exploration Programs

On June 25, 2020, the Company and strategic partner Tongling Non-Ferrous Metals of China (Tongling) agreed to defer the planned drilling and subsequent metallurgical testing program until the 2021 exploration season due to COVID19.

Permitting

The Company has been advised by the Ministry of Energy, Mines and Petroleum Resources that the four Kechika regional drill permits on the Pie, Yuen, Mt. Alcock, and Kechika North properties have been renewed for an additional 5-year period, until November 28, 2025. Drilling on these properties had previously been permitted with a renewal occurring in December 2015, extending the expiry date until December 31st 2019.

2019 Exploration Program

2019 Akie Drilling program

The 2019 exploration program was designed to achieve several key objectives including: additional close spaced drill intersections within the current resource model, extend the high-grade core of the Cardiac Creek deposit, and collect geotechnical and structural data. To achieve these objectives, the Company completed 4 HQ diameter diamond drill holes totaling 2,347 metres. A summary of the 2019 drill program is provided below.

The 2019 drill program returned impressive results characteristic of the high-grade core. Hole **A-19-153** returned an intercept of 30.14 metres (true width) grading 13.78% Zn+Pb, and 19.7g/t Ag that includes a high-grade core interval of 22.99% Zn+Pb, and 30.1g/ Ag over a true width of 9.44 metres. Hole **A-19-154** returned 8.30% Zn+Pb and 13.3 g/t Ag over a true width of 19.50 metres including 10.25% Zn+Pb and 15.4 g/t Ag over a true width of 11.97 metres. Along the southeast edge of the high-grade core **A-19-151** returned 16.37 metres (true width) grading 9.77% Zn+Pb and 15.5 g/t Ag. Higher-grade intervals are present including 10.74% Zn+Pb and 16.74 g/t Ag over a true width of 14.24 metres. Significant results from the 2019 drill holes are tabulated below.

Drill Hole	From (m)	To (m)	True Width (m)*	Zn (%)	Pb (%)	Ag (g/t) ^t	Zn+Pb (%)

^(*) The true width in metres is calculated utilising the Geovia GEMS software package. The orientation of the mineralised horizon is estimated to have an azimuth of 130 degrees and a dip of -70 degrees. (CCZ) = Cardiac Creek Zone; (HW) = Hangingwall Zone; (FW) = Footwall Zone; (MS) = Massive Sulphide. (†) Ag values below detection were given a value half of the detection limit for the purposes of weighted averaging. Hole A-19-152 was abandoned due to excessive deviation and restarted as hole A-19-153.

Exploration Objectives

Akie Project:

- Continue definition drilling to expand the known extent of the Cardiac Creek deposit; update the current geological and resource models to NI 43-101 standards with all new drill results. Continue to examine tradeoff studies to enhance the PEA including additional metallurgical lab testing and targeted geotechnical data acquisition to improve understanding of mine design parameters used in the PEA.
- · Continue to evaluate outlying coincident geological/geophysical/geochemical targets for drill target definition.
- Continue to refine the design and costs of the planned underground exploration program. The underground exploration permit remains in good standing until December 2021. The underground exploration program was conceived to allow tightly spaced infill drilling from an underground decline in order to upgrade the current mineral resource to the Indicated and Measured levels of confidence. This would provide sufficient data for a pre-feasibility level of economic assessment of the ore body to be completed and investigate future viability of bulk sampling and mining. The Company is currently working on a new and updated underground permit application to extend the duration date of the existing permit to 2025.
- Continue environmental baseline sampling as required to maintain all related exploration permits in good standing.

Kechika Regional Project:

- Continue regional synthesis of all historical and modern exploration data to assist with gap analysis and drill target definition.
- Continue to evaluate high priority greenfield targets.

Interim MD&A - Quarterly Highlights
For the nine months ended March 31, 2022 and 2021

Continue to refine target selection to identify drill targets.

Kechika Regional Project (Pie Option Properties):

- Continue to work closely with Teck to review and advise on plans for ongoing exploration on the properties.
- The next planned phase of exploration on the optioned properties is expected to include drill testing of key high priority targets.

Summary of exploration expenditures incurred on various properties:

	Α	kie Property	Kechika Regional	Total

Results of Operations

Nine Months Ended March 31, 2022 and 2021

During the nine months ended March 31, 2022, the Company reported a net and comprehensive loss of \$635,585 or \$0.004 per share compared to \$526,576 or \$0.003 per share during the same period last year, an increase in loss of \$109,009. The increase in net loss was due to an overall increase in operating costs and a decrease in income generated from the sale and fair market value adjustment of marketable securities and sale of fixed assets.

Interim MD&A - Quarterly Highlights
For the nine months ended March 31, 2022 and 2021

Overall general and administrative expenses decreased by \$3,107 during the nine months ended March 31, 2022 as compared to the same period of the previous fiscal year due to the following decreases in operating expenses:

- Consulting fees by \$33,761 as the Company did not engage additional advisory services for its OTCQB listing application and the Company's VP Exploration provided fewer services on corporate matters; and
- Depreciation of the right-of-use asset by \$27,721 as the Company's sublease ended November 30, 2021.
- Marketing and public relations by \$16,610 as the Company engaged few services for business development and shareholder awareness;
- Professional fees by \$3,878 as a result of less legal services required during the period.

Offsetting the decreases in expenses was an increase in:

- Office and miscellaneous by \$6,090 due to an increase in insurance premiums and website hosting fees;
- Regulatory and transfer agent fees by \$8,214 for the Company's OTCQB listing fees;
- · Rent increased by \$31,032 for the rental of the Company's corporate office space and storage units;
- Travel and promotion increased by \$11,383 due to lift on government imposed COVID19 travel and gathering restrictions; and
- Wages and benefits increased by \$23,602 primarily due to retroactive payment of salaries for the Company's exploration staff.

Also contributing to the increase in net loss was a decrease in other items:

- Interest income decreased by \$22,131 as the Company GIC investments matured and was not reinvested;
 and
- There were no gains on sale of marketable securities or adjustments for change in fair value of marketable securities compared to the same period last year as the Company held no marketable securities during the nine months ended March 31, 2022.

Three Months Ended March 31, 2022 and 2021

During the three months ended March 31, 2022, the Company reported a net and comprehensive loss of \$180,790 or \$0.001 per share compared to \$172,225 or \$0.001 per share during the same period last year, an increase in net loss of \$8,565. The overall increase in net loss was primarily attributable to a decrease in income earned by the Company offset by a decrease in expenditures.

Overall general and administrative expenses decreased by \$42,780 during the three months ended March 31, 2022 as compared to the same period of the previous fiscal year primarily due to a decrease in depreciation of the right-of-use asset as the Company's office lease expired in November 2021, marketing and public relations by \$21,644 as a result of a decrease in marketing services, and wages and benefits by \$19,217 due to a reduction in staff. These decreases were offset by an increase in rent by \$23,119 for the Company's monthly rental arrangement of its corporate office and a decrease in gains on sale of marketable securities by \$43,853 as the Company did not hold any investment securities during the period ended March 31, 2022.

Liquidity and capital resources

The Company's operations are currently not generating positive cash flow; as such, the Company is dependent on external financing to fund its activities. In order to carry out potential expansion and to continue operations, and pay for administrative costs, the Company will spend its existing working capital, and raise additional amounts as needed. Companies in this stage typically rely upon equity and debt financing or joint venture partnerships to fund their operations. The current financial markets are very difficult and there is no certainty with respect to the

Interim MD&A - Quarterly Highlights
For the nine months ended March 31, 2022 and 2021

Company's ability to raise capital. Management may require to seek additional sources of financing in the form of equity or debt financing in the future. These uncertainties may cast significant doubt about the Company's ability to continue as a going concern.

At March 31, 2022, the Company reported working capital deficiency of \$314,313 compared to a working capital of \$1,073,872 at June 30, 2021, representing a decrease in working capital of \$1,388,185. The decrease in working capital was a result of general operating activities and exploration expenditures incurred during the period.

Net cash decreased by \$1,993,260 from \$3,066,527 at June 30, 2021 to \$1,073,267 at March 31, 2022 primarily due to the Company's 2021 Akie drilling program.

During the nine months ended March 31, 2022, the Company generated or utilized its cash and cash equivalents as follows:

- (a) the Company used \$596,262 (2021 \$591,770) of its cash in operating activities;
- (b) exploration expenditures during the period were \$1,359,253 (2021 \$25,508) as a result of the Company postponing its exploration program in fiscal 2021 due to COVID19 safety measures;
- (c) \$2,646 (2021 \$2,205) was used for the purchase of camp fixtures and office furniture and \$Nil (2021 \$15,051) was generated from the proceeds from sale of fixed assets;
- (d) the Company redeemed \$Nil (2021 \$1,335,218) of its GIC investments;
- (e) paid \$37,500 (2021 \$67,500) in lease payments for its corporate office; and
- (f) the Company received proceeds \$Nil (2021 \$108,178) from the sales of marketable securities.

The Company's current assets excluding cash consisted of the following:

	March 31, 2022	June 30, 2021		
Government Sales Tax credits	\$ 7,497	\$ 34,848		
Interest accrued on reclamation deposits	938	132		
Trade receivables	-	16,431		
Prepaid expenses	38,158	35,200		

As of March 31, 2022, the Company prepaid a total of \$2,700 for exploration and evaluation assets.

Current liabilities as of March 31, 2022 consisted of the following

- trade payables and accrued liabilities of \$34,619 (June 30, 2021 \$641,847), which mainly consisted of trade payables and accrued liabilities and were paid subsequent to March 31, 2022;
- current portion of lease liability of \$Nil (June 30, 2021 \$36,580) recognized in relations to the Company's office lease;
- due to related parties of \$1,399,554 (June 30, 2021 \$1,400,839) consisting of an advance of \$1,398,686 (June 30, 2021 \$1,398,686) received from Tongling, a significant shareholder of the Company, for the Akie Property's drill program, \$2,000 (June 30, 2021 \$2,000) in consulting fees owed to a company owned by a director of the Company, \$365 (June 30, 2021 \$153) in office expense reimbursement owed to a company with two common directors of the Company; and a receivable of \$1,497 (June 30, 2021 \$Nil) for an overpayment of office expense reimbursement from the CEO of the Company.

The other sources of funds potentially available to the Company are through the exercise of outstanding stock

options and agent's warrants. See Other Requirements – Summary of Outstanding Share Data. There can be no assurance, whatsoever, that any or all these outstanding exercisable securities will be exercised.

The Company has and may continue to have capital requirements in excess of its currently available resources. In the event the Company's plans change, its assumptions change or prove inaccurate, or its capital resources in addition to projected cash flow, if any, prove to be insufficient to fund its future operations, the Company may be required to seek additional financing. Although the Company has been successful in raising the above funds, there can be no assurance that the Company will have sufficient financing to meet its future capital requirements or that additional financing will be available on terms acceptable to the Company in the future.

The Company's overall success will be affected by its current or future business activities. The Company is currently in the process of acquiring and exploring its interests in resource properties and has not yet determined whether these properties contain mineral deposits that are economically recoverable. The continued operations of the Company and the recoverability of expenditures incurred in these resource properties are dependent upon the existence of economically recoverable reserves, securing and maintaining title and beneficial interest in the properties, obtaining necessary financing to explore and develop the properties, and upon future profitable production or proceeds from disposition of the resource properties.

The Company is exposed in varying degrees to a variety of financial instrument related risks:

Credit Risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company's primary exposure to credit risk is on its bank deposits of \$1,073,267 (June 30, 2021 - \$3,066,527). This risk is managed by using major Canadian banks that are high credit quality financial institutions as determined by rating agencies.

The Company's secondary exposure to credit risk is on its receivables. This risk is minimal as receivables consist primarily of refundable government sales taxes and interest accrued on GIC investments.

Liquidity Risk

Liquidity risk arises through the excess of financial obligations over available financial assets due at any point in time. The Company's objective in managing liquidity risk is to maintain sufficient readily available reserves in order to meet its liquidity requirements at any point in time. The Company achieves this by maintaining sufficient cash and cash equivalents. As at March 31, 2022, the Company was holding cash and of \$1,073,267 (June 30, 2021 - \$3,066,527) to settle its current liabilities of \$1,434,173 (June 30, 2021 - \$2,079,266). Management may require to seek additional sources of financing in the form of equity or debt financing in the future. These uncertainties may cast significant doubt about the Company's ability to continue as a going concern.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices. These fluctuations may be significant and the Company, has exposure to these risks.

a. Interest Rate Risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because

Interim MD&A - Quarterly Highlights
For the nine months ended March 31, 2022 and 2021

of changes in the market interest rates. The Company is not exposed to significant interest rate risk.

b. Currency Risk

The Company operates in Canada and is therefore not exposed to significant foreign exchange risk arising from transactions denominated in a foreign currency.

c. Price risk

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Company closely monitors certain commodity prices, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.

Transactions with related parties

Key management personnel includes persons having the authority and responsibility for planning, directing, and controlling the activities of the Company as a whole. Key management personnel comprise of the directors of the Company, executive and non-executive, and Vice President of Exploration.
