 FOR THE THREE MONTHS ENDED SEPTEMBER 30, 2010 AND 2009
 (Unaudited – Prepared by Management)

1. BASIS OF PRESENTATION

These interim consolidated financial statements have been prepared using Canadian generally accepted accounting principles (Canadian GAAP). The interim consolidated financial statements include normal recurring adjustments, which in management’s opinion, are necessary for a fair presentation of the financial results of the interim period presented.

The disclosures in these statements do not conform in all aspects to the requirements of Canadian GAAP for annual financial statements. These statements follow the same accounting policies and methods of their application as the most recent annual consolidated financial statements. These statements should be read in conjunction with the Company’s June 30, 2010 consolidated financial statements and notes thereto.

Title to resource properties involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many resource properties. The Company has investigated title to all of its resource properties and, to the best of its knowledge, title to all of its properties are in good standing.

DA Property, Northwest Territories

The Company holds an 8.2% interest, subject to a 5% gross overriding royalty (“GOR”) on diamonds, a 5% net smelter returns (“NSR”) royalty on other minerals, and a 10% net profits interest (“NPI”), in certain mineral claims located in the Northwest Territories. Pursuant to an amended and restated Mineral Property Option Agreement, dated August 30, 1998, the Company has the option to reduce the GOR and NSR interests to 2.25% and 2%, respectively, and eliminate entirely the NPI by completing certain share issuances and cash payments to the original property owner within 90 days of a production decision.

7. CAPITAL DISCLOSURE

The Company's objective is to manage its capital to ensure that there are adequate capital resources to safeguard the Company's ability to continue as a going concern through the optimization of its capital structure. The capital structure consists of shareholders' equity and working capital.

In order to achieve this objective, the Company makes adjustments to it in light of changes in economic conditions and risk characteristics of the underlying assets. To maintain or adjust capital structure, the Company may invest its excess cash in interest bearing accounts of Canadian chartered banks and/or raise additional funds externally as needed. The Company has no significant debt and is not subject to externally imposed capital requirements. There were no changes to the Company's capital management structure during the period ended September 30, 2010.

8. FINANCIAL INSTRUMENTS

Financial Risk Management

The Company is exposed in varying degrees to a variety of financial instrument related risks.

Credit Risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company's primary exposure to credit risk is on its bank accounts and short-term investments, whose balances at September 30, 2010 were \$96,874 and \$5,344,000 respectively. Bank accounts are held with a major bank in Canada. As all of the Company's cash is held by a Canadian bank and all the cash equivalents are also held by the same Canadian bank, there is a concentration of credit risk with one bank in Canada. This risk is managed by using a major bank that is a high credit quality financial institution as determined by rating agencies. The Company's secondary exposure to credit risk is on its receivables. This risk is minimal as receivables consist primarily of refundable government sales taxes.

Currency Risk

The Company operates in Canada and is therefore not exposed to significant foreign exchange risk arising from transactions denominated in a foreign currency.

Interest Rate Risk

The Company is exposed to interest rate risk as its bank accounts and guaranteed investment certificates ("GIC") earn interest income at variable rates. As at September 30, 2010, the Company had one GIC of \$4,735,000 earning a variable rate of approximately 1.15% and another GIC of \$609,000 earning a fixed rate of 0.85 %.

Liquidity Risk

Liquidity risk arises through the excess of financial obligations over available financial assets due at any point in time. The Company's objective in managing liquidity risk is to maintain sufficient readily available reserves in order to meet its liquidity requirements at any point in time. The Company achieves this by maintaining sufficient cash and cash equivalents. As at September 30, 2010, the Company was holding cash of \$96,874 and guaranteed investment certificates of \$5,344,000 to settle current liabilities of \$1,043,898. Management believes it has sufficient funds to meet its current obligations as they become due. In addition, subsequent to the period ended September 30, 2010, the Company completed a non-brokered private placement and received gross proceeds of \$18,000,000 (Note 9(d)).

8. FINANCIAL INSTRUMENTS (cont'd)

Price risk

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market.
